

EP-Evaluator (EE) software launches in Latin America.
Quality Assurance for the Clinical Laboratory

São Paulo, December 1, 2009. In November 2009, the Latin American subsidiary of Data Innovations sponsored two workshops to launch the Quality Assurance (QA) program, EP Evaluator (EE) in the region. These two workshops were held in São Paulo (Nov. 10th) and Rio de Janeiro (Nov. 12th). Dr. David Rhoads conducted these workshops.

In these workshops, topics discussed by Dr. Rhoads included:

- The importance of quality in clinical laboratories.
- The importance of Performance Standards in clinical laboratories.
- Using software statistical tools to improve the quality of results in a clinical laboratory.

Attendees at these workshops included QA and Workflow staff from several local hospitals and reference laboratories and also included representatives from the main clinical laboratory instrument vendors.

With this launch, the Latin America customers will have regional sales and support.

For more information about EE, contact our Sales and Marketing Department at (55)11-3801-3283 or (55)11-3871-9592, or through e-mail latinamerica-sales@datainnovations.com.

About EP Evaluator (EE):

The software program EP Evaluator (EE) is the world-wide leader in Quality Assurance software. It is used in more than 2000 clinical laboratories in the United States of America, Canada, Europe, Latin America and Asia.
